Permaculture Project: Workshop

What do these things all have in common?

What do these things all have in common?

What do these things all have in common?

A Shed – Much More Than a Storage Space!

YES, A PLACE TO HANG THE TOOLS...

A MEETING PLACE

- A place for people to come together, share interests and skills and generally work with each other.

A SPACE THAT CAN IMPROVE PEOPLE'S WELLBEING

- A place that encourages people to go outdoors and enjoy the simpler things in life

A RETREAT

- A safe and friendly environment where people can work together on meaningful projects at their own pace.

Our Pitch for a Shed

We'd like your help to raise £400 for a new shed for our Community Garden at Westbury Arts Centre

THE PROJECT

We're creating a Permaculture Community Garden that works in harmony with nature to be self-sustaining and cater for our local people.

- **EARTH CARE:** Using the space in a way that has a natural balance between pests and beneficial insects to maintain the garden naturally. (eg Slug eating frogs etc.)

- **PEOPLE CARE:** Bringing people together to create a community-owned garden where the vegetables and plants grown can be enjoyed by the local community (incl. local schools) – from tending to them and learning about them to eating them and sharing recipes, knowledge and cooking skills about them.

- **FAIR SHARE:** Our garden will be a social enterprise; *made by locals for locals*. Our work together will support community food, education and social needs.

WITH A SHED AT THE CENTRE OF IT ALL!

And Finally

Once you've voted to help us get our shed...

Join our group.

Everyone is welcome!

Our first event takes place on
Sunday 22 October at
Westbury Arts Centre.

**Come and speak to us about joining-
in and signing-up today**

Or, visit the Westbury Arts Centre and
Transition Town MK websites for more info.
